

Installing and activating qbase⁺ software

For use with geNorm[™] and
geNormPLUS[™] Reference Gene
Selection Kit

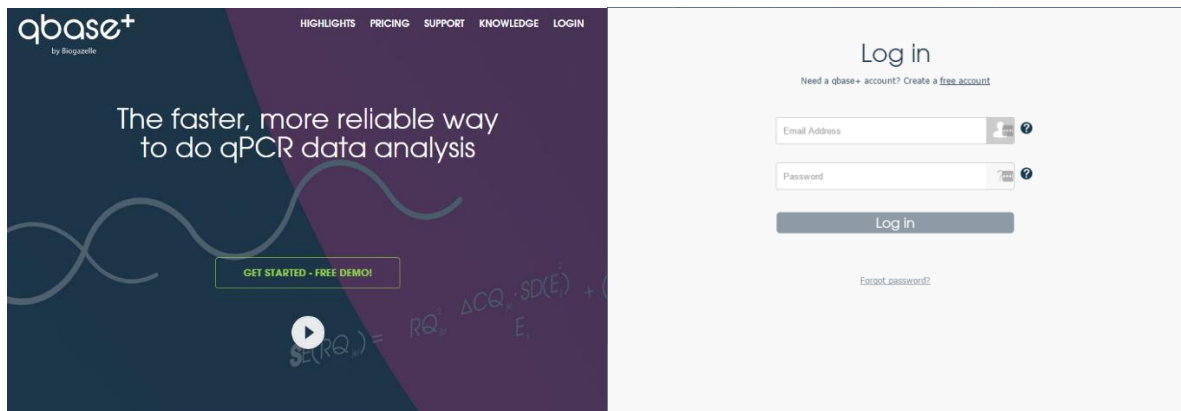

GE

geNorm and geNormPLUS reference gene selection

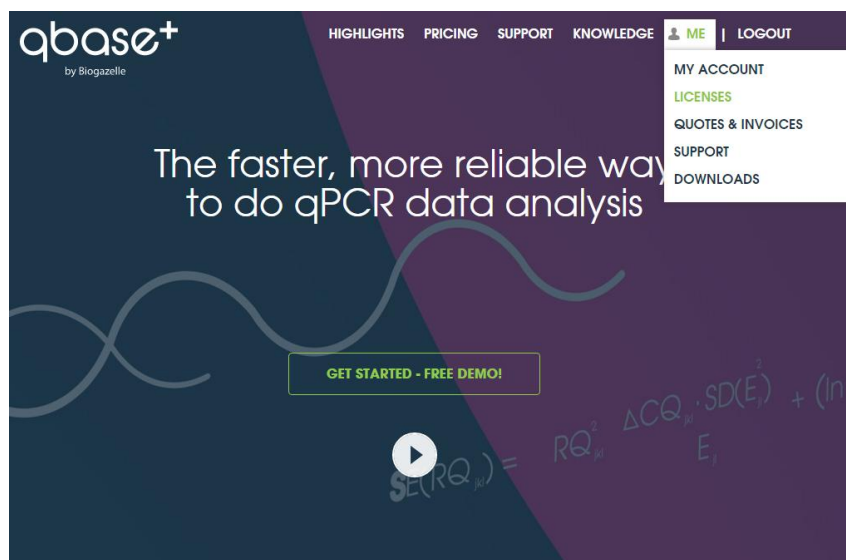

Installing and activating qbase+

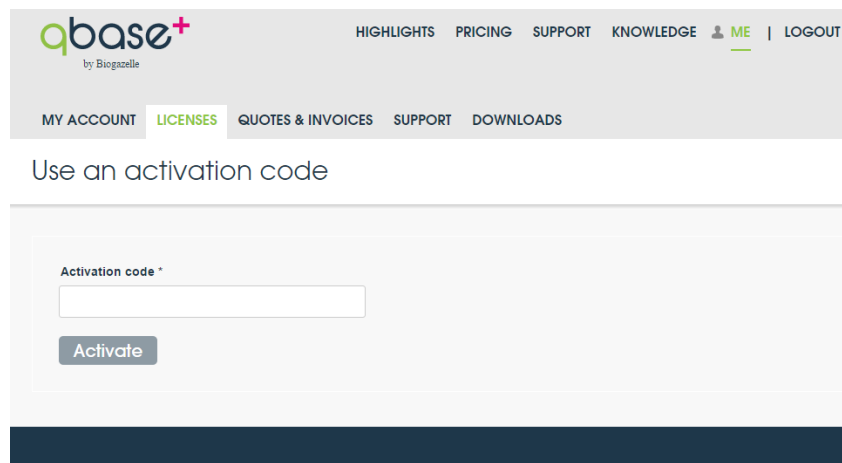

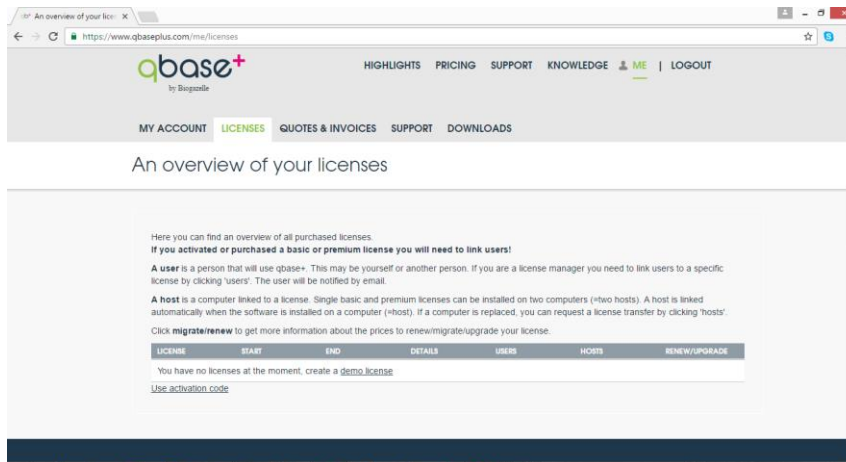

qbase+ is the world's leading real-time PCR data analysis software. The software includes a module for geNorm analysis (this is a much improved version of the free Microsoft Excel based software available previously). geNorm kits are supplied with an activation code for qbase+ that gives 2 months access to the geNorm functionality.

1. Register on qbaseplus.com

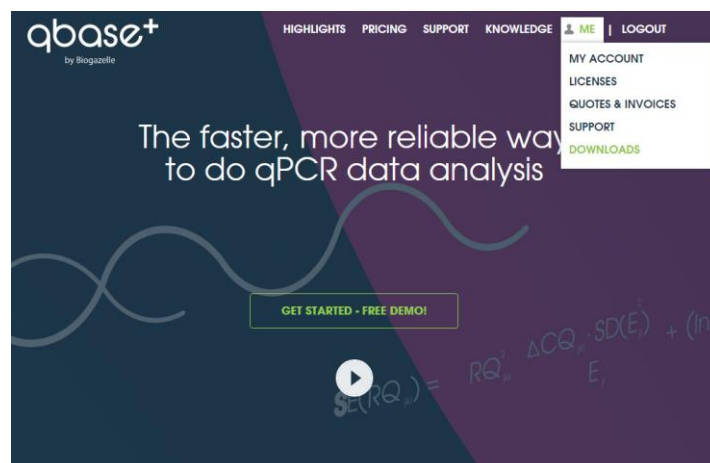

To download the qbase+ software you must first register on the qbaseplus webpage. Visit <https://www.qbaseplus.com> click on [login](#) on the top right of the screen and then [create a free account](#) and follow the instructions to create a new account.

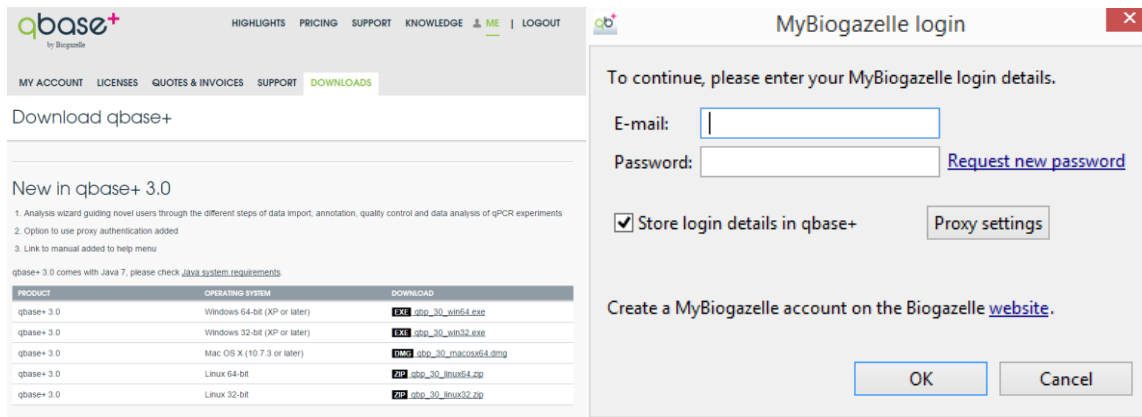

2. Activate your license on qbaseplus.com

Once you have logged in to the qbaseplus.com webpage, select the tab labelled [me](#) and then click [licenses](#). On the licenses page click [use activation code](#) at the bottom of the page and then enter your activation code in the box when prompted and click [activate](#).

3. Download qbase+

Click the [me](#) tab again and this time select the [download](#) option. On the next screen select the correct download option for your operating system. Once the setup program has downloaded, run it to install qbase+ on your computer. Once qbase+ has been installed run the program and log in using the same details that you registered on the site with.
